Why Star Rated Solar Water Heater systems prove to be better than the non-star-rated other systems?

Let's understand what is star rating and why it is introduced:

What is BEE?

- The Government of India has set up the Bureau of Energy Efficiency (BEE) in 2002 under Ministry of Power.
- BEE aims to promote the use of energy-efficient products, keeping consumers interest in mind.

Who can get Star Rating?

- The products that conform to standards developed by the Bureau of Indian Standards (BIS)
- The products that are tested in BIS recognized and NABL accredited labs such as Regional Test Center Pune.

What is BIS?

- The BIS works under the Ministry of Consumer Affairs Food and Public Distribution.
- The Bureau creates minimum qualifying specifications for the product based on Consumers interests.
- The manufacturer has to produce the product according to the specifications.

What do the customers get?

- The customers receive what they pay for.
- Energy efficient product with a guarantee of hot water, as per commitment
- High-quality tubes with higher absorption and lesser emission.
- High-quality insulation to keep water hot for a longer duration of time.
- Superior product performance and long product life.
- Customers receive genuine products.
- Customers can easily compare Star Rated solar water heaters and non-star rated solar water heaters and avoid being misled.
- Customer gets efficient Solar Water Heater.
- The star label indicates how the solar water heater is energy efficient
- The Solar Water Heater technical specifications are according to standards and verified by government/government authorized lab.

All the above benefits ensure and the government authentication proves that Star-rated Solar Water Heater is much better than a non-star-rated Solar Water Heater.

Issued in consumer's interest by Sudarshan Saur Shakti Pvt. Ltd.
